## DETAILED ACTION

### Status of Application.

1. This case was previously assigned to Group 2735, but has been reassigned to Group 2635. Accordingly, all correspondence regarding this case should reflect Group 2635.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-27 are rejected under 35 U.S.C., 103(a) as being unpatentable over Verster (5214410) and Landt (5030807) and Boyles (5602535).

Verster discloses mounting on each tagged object an RFID transceiver (20) and a portable transceiver unit having an antenna (12) but does not disclose adjusting performance parameters for reliable two-way communication range, and that the tag is a modulated back scatter transceiver.

Art Unit: 2635

In analogous art, Landt teaches a sensitivity control signal (38) and reception sensitivity (120 for the purpose of improving the error rate of the transmitting signal and the tag will back scatter modulate the signal from the interrogator.

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have utilized the reception sensitivity of Landt in the tag system of Verster since such would improve the quality of the signal received thereby effecting the reliability range of the tag.

In an analogous art, Boyles suggests limiting the range of the transponder such that the distance between the user and the device during operation is slightly greater than the operational range of the transponder to prevent the operation of other transponders, since they will be out of range.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 2635

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1-27 are rejected under the judicially created doctrine of double patenting over claims 1-5 of U. S. Patent No. 6097301 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a method of adjusting two way communication range of an RFID system.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
